

Inserting machine SI 1050

Plug & Play – speed up your mail processing

Time is money

... especially when dealing with routine work like folding and inserting letters. Automating this task will provide your employee time for other more important duties.

The new HEFTER Systemform inserting machine SI 1050 processes the insertion of letters easily and works fast thanks to the modern but proven technology. It works reliable, accurate and at the push of a button.

Plug & Play

Just place the documents, enclosures and envelopes into the feeding stations and start. You may add your marketing papers such as flyers or reply cards to all your outgoing mails, without any additional effort.

This way your outgoing mail is processed reliably and in no time, with up to 900 envelopes per hour!

Versatility that does convince

The basic model includes an automatic feeding station for A4 documents and for the envelopes as well as another, half automatic, feeding station for your daily mail. But the SI 1050 can also be equipped with an additional station for enclosures and/or a second feeding station for A4 documents. On request the SI 1050 can be retrofitted with the second A4 document station easily by yourself anytime.

Arrange your outgoing mail exactly to your needs

Fully automatic operation

- Collecting, folding and inserting a constant number of forms per envelope, out of different feeding stations, e.g. for mailings, circulars and more
- To add enclosures automatically is optional e.g. for advertisement purposes

Semi-automatic daily mail function

- Folding and inserting individual letters by manual feeding
- To add enclosures automatically is optional e.g. for advertisement purposes
- Even stapled document-sets can be processed via daily mail feeder

Only folding and collecting

- Folding a flyer or form in order to produce enclosures
- Collecting and folding of forms out of one or two feeding stations

1 Productive

Up to 900 insertions per hour are no problem for the SI 1050 folder inserter – up to 8 times faster compared to the manual process!

2 Versatile & modular

Folding and inserting the daily mail – or rather processing several forms simultaneously? The SI 1050 is fast and modular upgradeable.

3 User friendly

Intuitive and clear – working with the SI 1050 is simple, even for untrained users.

Advantages of the SI 1050 at a glance

- Around 8 times faster than inserting your mail manually
- Saves labour costs
- Easy to operate
- Works reliable and quiet
